ABOUT

The **weBoost RV50** delivers full coverage for large RVs up to 50 feet. Designed for use when parked, it shares the RV35's home-booster-grade amplifier but pairs it with our higher-gain Omni Plus antenna, plus a second internal antenna for full front-to-back coverage. No aiming. No setup. Just park and connect—front of the rig to the back.

The weBoost RV50 is ideal for RV owners who require consistent cellular connectivity at the campsite. Whether you're traveling to remote areas, camping in national parks, or staying in RV parks with weak signals, this booster ensures you stay connected once you've arrived and set up. It supports multiple devices, enhances data speeds, and reduces dropped calls, making it perfect for work, entertainment, and emergency communication needs. The simple installation ensures it fits seamlessly into any RV setup, providing reliable performance wherever your adventures take you.

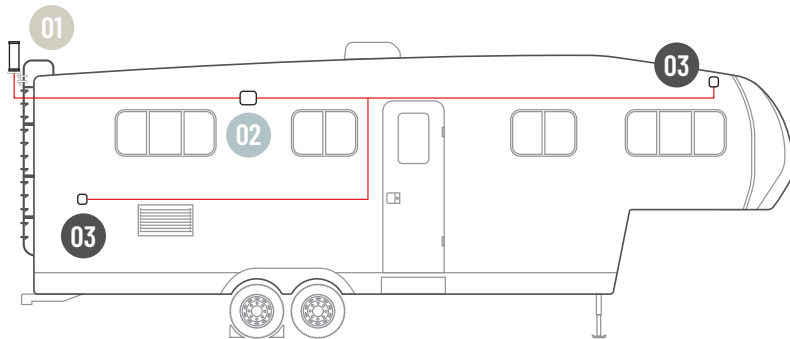

Like all weBoost boosters, the RV50 is FCC-approved and comes with a 2-year warranty.

HOW IT WORKS

- 01 Outside Antenna:** The outside antenna communicates back and forth with nearby cell towers.
- 02 Booster:** The booster amplifies any cell signal it receives from the outside antenna.
- 03 Inside Antennas:** Two inside antennas rebroadcast the amplified signal for use throughout the RV.
